ThermoFisher
SCIENTIFIC

The world leader in serving science

Urology Solutions for Your Practice

At Thermo Fisher Scientific we provide a comprehensive range of Healthcare and Scientific consumables and devices specifically for urology in both hospital and community settings.

We have long standing partnerships with global market leading suppliers and also complement these key agencies with our own private brand - promed®.

We have refined our vast selection of products into this catalogue to help you provide positive patient outcomes. Some of the speciality products featured in this catalogue include our customised promed® TURP surgical procedure packs and drapes. In a hospital setting, health care professionals are exposed to an extremely wet environment, especially during TURP procedures. Our innovative range of fluid control products will aid the control of fluid and reduce the risk of personal contamination during surgery. Other newly developed products include the new promed® catheter pack.

Parker Laboratories ultrasound transmission gels, our extensive range of promed® PPE, SignosRT portable ultrasound device for bladder scanning applications and PDI and Briemar infection control consumables have also been included.

Diagnostic Imaging Solutions

Thermo Fisher Scientific has a long established reputation as an Australian supplier of diagnostic imaging consumables and devices. Our portfolio includes products by Signostics Limited and Parker Laboratories, as well as our own brand products such as positioning foams and lead protective products.

The Thermo Fisher Scientific team trusts you will find a solution from our comprehensive range.

Infection Control Solutions

Our flagship brand promed® continues to provide a 'solutions-based' approach to customer needs, specialising in clinical apparel and disinfection. The promed® brand range has a strong reputation for reliable and competitively priced clinical consumables. Complimenting the promed® range, we also offer Briemar® and PDI® branded products.

Our range of infection control products is constantly expanding with new and innovative consumable solutions that compliment the national health policy, professional needs and work practices in the dynamic healthcare community.

Surgical & Operating Room Solutions

The extensive range of promed® surgical drapes, surgical gowns and custom procedure packs have been designed in Australia, in consultation with Australian Urologists, Continence Nurses, Theatre Nurses and Nurse Unit Managers. The latest quality materials are combined to ensure:

- Absorbency and Fluid Management
- Waterproofing where required to eliminate strikethrough
- Patient comfort through low weight fabrics and skin friendly adhesives
- Operating Theatre safety through low flammability
- Strength and drapability

Critical Care Solutions

Thermo Fisher Scientific is proud to be an important supplier of respiratory and Oxygen Therapy products to the Australian and New Zealand Healthcare markets. We consistently strive to create greater value for our customers with our premium quality promed® respiratory therapy range of consumables.

Diagnostic Imaging

Evolution in portable handheld ultrasound - The SignosRT by Signostics. Perfect for bladder scanning!

Australian made, the SignosRT is a flexible, award-winning design with multiple features making it an invaluable tool for everyday use. Offering the convenience of Real-Time B-Mode, M-Mode and PW Doppler imaging, volume measurements and simple to access presets, SignosRT is the ideal companion for any healthcare professional.

Easy access to USB port and headphone jack, touch screen stylus and 4GB microSD data card (included) which enables you to store 10,000+ images.

Convenient USB connection enables removable probe to be directly connected to your Windows based PC, laptop or tablet running the accompanying SigViewer software.

High resolution touch screen display shows accurate images and enables you to easily and quickly access a wide range of applications – Presets, Scanning Modes, Depth, Gain, Measurements, Patient Information, Text Annotation and Voice Recording – for fast clinical review.

The 'S3-5' is suitable for all applications of the Signos RT, providing higher resolution images from superficial areas through to 18cm.

Designed to Make Ultrasound Easy

Signos RT powers up from sleep mode instantly, ready to use when and wherever you need it. Use entirely as a stand alone ultrasound system or simply plug the hand-held display unit or ultrasound probe directly into your Windows based PC, laptop or tablet running the specially designed SigViewer software, standard with all Signos RT devices. Ideally suited for those occasions when you need the flexibility of a larger display.

Parker Ultrasound Products

Aquasonic 100® Ultrasound Transmission Gel

World standard for medical ultrasound transmission, Aquasonic 100 is the widely used gel for diagnostic and therapeutic medical ultrasound. Recommended for all procedures where a viscous gel is required.

Features:

- Correct acoustics for the broad range of frequencies used
- Completely aqueous, will not stain clothing or damage transducers
- Unique "can't be copied" formula is skin friendly, bacteriostatic, non-sensitising and non-irritating
- No formaldehyde
- Not a spermicide
- Used and recommended by leading manufacturers of medical ultrasound equipment worldwide

Item Code	Description	UOM
PKR01-50	Aquasonic 100; 5L SONICPAC with refillable dispenser	1/Box
PKR01-08	Aquasonic 100; 250mL bottle	12/Box
PKR01-20	Aquasonic 100; 20g sachet	100/Box

Sterile Aquasonic 100® Ultrasound Transmission Gel

World Standard for Sterile ultrasound gel. Sterile Aquasonic® 100 is the recommended for diagnostic and therapeutic ultrasound applications when sterility is indicated.

Features

- Overwrapped, sterilised foil pouches
- Acoustically correct for the broad range of frequencies used in medical ultrasound
- Non-irritating, hypoallergenic
- Completely aqueous, will not stain clothing or damage equipment

Item Code	Description	UOM
PKR01-01	Sterile Aquasonic 100; 20g overwrapped, sterilised foil pouches	48/Box

Aquasonic Clear® Ultrasound Gel

Clear ultrasound gel. Based on the same "can't be copied" formula of the World Standard, Aquasonic 100 Ultrasound Transmission Gel, without fragrance or colour. For diagnostic and therapeutic medical ultrasound examinations.

Features:

- No fragrance or colour
- Correct acoustics for the broad range of frequencies used
- Hypoallergenic, bacteriostatic, non-irritating
- Water soluble
- No formaldehyde

Item Code	Description	UOM
PKR03-08	Aquasonic Clear; 250mL bottle	12/Box
PKR03-50	Aquasonic Clear; 5L SONICPAC with refillable dispenser	1/Box

Aquaflex® Ultrasound Gel Pad

A 2cm x 9cm aqueous, flexible, disposable ultrasound standoff for use in difficult to visualise and near field areas, or when gels alone won't do. Disposability eliminates the risk of cross contamination in diagnostic and therapeutic ultrasound procedures.

Features:

- Requires no gel, except in prolonged procedures
- Requires only gentle, even pressure
- Cushions sensitive areas
- Hypoallergenic, Bacteriostatic
- Easy to use
- Disposable

Item Code	Description	UOM
PKR04-02	Aquaflex Ultrasound Gel Pad; 2cm x 9cm pad	6/Box

Transeptic® Cleaning Solution

Multi-purpose spray for professional use when cleansing ultrasound transducer/probe surfaces between procedures.

Features:

- Convenient clear spray dispenser
- Does not contain phenol or glutaraldehyde
- Accepted for use by manufacturers of ultrasound equipment

Item Code	Description	UOM
PKR09-25	Transeptic Cleaning Solution; 250mL clear spray bottle	12/Box

Does not cause
transducer
membrane
swelling.

Scan® Ultrasound Gel

Our exclusive dual-viscosity formula allows SCAN to be applied as a gel and scanned as a fluid. For medical ultrasound procedures when a less viscous gel is desired.

Features:

- Accoustically correct, provides superior transmission of ultrasound waves
- Completely aqueous, will not stain clothing, damage equipment or irritate skin
- Hypoallergenic, bacteriostatic with no formaldehyde

Item Code	Description	UOM
PKR11-28S	SCANPAC contains: 4 x 3.8L of SCAN, 2 refillable dispensers and 1 pump	4/Box

Aquagel® Lubricating Gel

Clear, water-soluble, non-irritating lubricant. Compatible with natural and synthetic substances...the international choice for a non-sterile lubricating gel.

Features:

- Convenient flip cap
- For hospital, medical and personal use
- Economical 2 litre dispenser
- Non-runny, viscous gel
- Not a contraceptive
- Hypoallergenic, bacteriostatic

Item Code	Description	UOM
PKR57-05	Aquagel Lubricating Gel; 142g tube	20/Box

Eclipse® / Eclipse 3D Probe Cover

A soft, latex-free, disposable probe cover; one that is designed for standard ultrasound probes/transducers, and the other is designed specifically for 3D/4D ultrasound probes/transducers Both are pregelled inside with Aquasonic 100 Ultrasound transmission Gel.

Features:

- Pre-gelled inside with Aquasonic 100 Ultrasound Transmission Gel
- Latex-free, non-irritating, non-sensitising
- Only one probe cover is required for each procedure

Fits most
endocavity
ultrasound probes

Item Code	Description	UOM

PKR38-03	NEW Eclipse 3D Probe Cover - Latex Free; 83 x 43 x 241mm	100/Box

Sanitising Hand Gels

The range of Derasoft Sanitising Hand Gels are soft on skin but hard on bacteria. Derasoft Sanitising Hand Gel is not a replacement for hand-washing. It is used in conjunction with a hand washing program to provide the ultimate in hand hygiene. Derasoft Sanitising Hand Gel offers a more convenient means of sanitising your hands. As the product requires no water, it can be applied in seconds and eliminates disposal of paper towels.

Independent tests have shown Derasoft Sanitising Hand Gel kills 99.99% (Log 4 reduction) of the following organisms in 30 seconds upon application*:

- Staphylococcus aureus
- MRSA (Methicillin Resistant Staphylococcus aureus)
- Pseudomonas aeruginosa
- E. coli
- Salmonella typhimurium
- Candida albicans
- Listeria monocytogenes
- Streptococcus agalactiae

* Microtech Biocidal evaluation of Derasoft Sanitising Hand Gel, ref 97036495, 1998

Surgical Consumables

H2NO Anti-Fatigue Fluid Control Floor Mat

The H2NO Suction & Anti-Fatigue Mat is a single-use antimicrobial disposable surgical mat that absorbs waste fluid and reduces fatigue.

The H2NO mat incorporates non-slip moulded foam with customised tapered fluid channels to facilitate keeping the surgical teams' feet dry and reduce the risk of tracking body fluids throughout the operating room. The mat also incorporates a highly effective vacuum system for quiet, continuous suction. The elasticity and cushioning of the H2NO provides exceptional comfort during prolonged surgeries.

Item Code	Description	UOM
DRYH2NO	H2NO Anti-Fatigue & Fluid Control Floor Mat	10/Carton

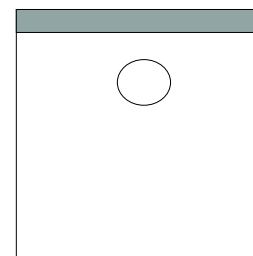

Surgical Drapes

The extensive range of promed[®] surgical drapes have been designed in Australia, in consultation with Australian Surgeons, Nurses and Theatre Managers. From the generous sizing of the promed[®] drapes, to the absorbency and strength of the materials used, the entire range is designed to meet Australian Theatre Protocols, Standards and Operating Procedures.

The latest quality materials are combined in the manufacture of the promed[®] drapes to ensure:

- Absorbency and fluid management
- Waterproofing where required to eliminate strikethrough
- Patient comfort through low weight fabrics and skin friendly adhesives
- Operating Theatre safety through low flammability
- Strength and drapability

Item Code	Description	UOM
